PROFESSIONAL SUMMARY

Frontend UX Engineer with 4+ years of experience leading customer-facing products from research, wireframes, and prototypes through production code, QA, and launch. Combines React, Next.js, TypeScript, Node.js, Shopify Hydrogen, C#, and WordPress development with UX strategy, responsive design, accessibility, and conversion-focused product storytelling. Delivered work across 10+ brands, 100+ product offerings, and digital experiences receiving 850,000+ annual visits.

PROFESSIONAL EXPERIENCE

Frontend UX Engineer / E-commerce Frontend Developer July 2023 - Present

Red7 Systems

- Own frontend product work from wireframes and visual direction through implementation, automated and responsive QA, CI/CD, and launch across e-commerce, SaaS, and marketing products.
- Launched 1 Shopify Hydrogen storefront and 3 React/Next.js applications supporting direct-to-consumer and B2B brands.
- Build and maintain production experiences with React, Next.js, TypeScript, JavaScript, Shopify Hydrogen, WordPress, PHP, HTML, and CSS.
- Support 10+ brands, 100+ product offerings, custom product configurations, and websites receiving 850,000+ annual visits.
- Create reusable UI components, product flows, comparison tools, landing pages, and customer education that clarify complex purchasing decisions.
- Added Playwright coverage for critical user journeys and performed cross-browser, responsive, accessibility, and release QA.
- Produced 389+ Amazon listing assets and product visuals, aligning marketplace presentation with on-site customer experience.
- Partner with leadership, engineering, marketing, and operations in a five-person cross-functional team to move work from concept through production.

UX/UI Front-End Developer 2022 - 2023

Monnit Software

- Generated \$65,000 in client revenue through custom software design and frontend implementation.
- Led the end-to-end redesign of a software platform, from UX evaluation and usability testing through wireframes, visual direction, stakeholder presentation, and production implementation.
- Redesigned onboarding, homepage, and product-setup experiences using research, testing, and data-informed design decisions.
- Created user flows, wireframes, high-fidelity interface concepts, and redesign presentations using Adobe InDesign; presented recommendations to stakeholders.
- Translated approved designs into responsive software interfaces using JavaScript, C#, HTML, and CSS.
- Created an instructional animation showing users how to install the Progressive Web App (PWA) directly from a browser instead of through an app store.

SELECTED PROJECTS

Cabana Filters | cabanafilters.com

Shopify E-commerce — Designed and built responsive Shopify experiences, product education, comparison content, landing-page systems, structured data, and branded visual assets for an air-filter brand.

StudioPlayer | studioplayer.com

SaaS / Digital Signage — Designed and developed a responsive SaaS marketing experience that translated a technical platform into a clearer customer journey and stronger visual hierarchy.

My Logo Mat | mylogomat.com

Custom Product E-commerce — Built product-focused frontend experiences for a configurable custom-product business, including responsive layouts, customer education, and conversion-oriented shopping flows.

Concrete Connections NWA | concreteconnectionsna.com

Independent Client — Led UX/UI direction, brand presentation, and frontend implementation for an artificial-rockwork and concrete-sculpting business from concept through production launch.

ADDITIONAL EXPERIENCE

UX/UI Designer 2018 - 2019

Eufaula Properties

- Created the company logo, website designs, wireframes, and prototypes while supporting Google Analytics, lead-generation marketing, and promotional materials.

Art Director 2015 - 2020

Cemrock Landscapes

- Increased company profits by \$1.2M through process improvements, led a team of artists, and delivered large-scale architectural design projects.
