PROFESSIONAL SUMMARY

Frontend UX Engineer and Design Engineer with 4+ years of experience taking e-commerce, SaaS, and marketing experiences from wireframes and prototypes through production code. Combines React, Next.js, Shopify Hydrogen, and WordPress development with UX/UI design, responsive systems, accessibility, and conversion-focused product presentation. Delivered customer-facing work across 5+ brands, 100+ product offerings, and digital experiences receiving 850,000+ annual visits.

CORE SKILLS

Frontend: React, Next.js, JavaScript, HTML5, CSS3, Shopify Hydrogen, WordPress, PHP, Node.js, Git/GitHub

UX and Product Design: Figma, wireframing, prototyping, responsive UI, design systems, accessibility, interaction design

E-commerce and Visual Design: Shopify, product configuration, landing pages, customer education, Adobe Illustrator, Photoshop, XD

Additional: Tailwind CSS, Bootstrap, Material UI, Firebase, AWS S3, Google Maps API, AI-assisted product workflows

PROFESSIONAL EXPERIENCE

Frontend UX Engineer / E-commerce Frontend Developer

Red7 Systems | July 2023 - Present

- Own frontend product work from wireframes and visual direction through implementation, responsive QA, and launch across e-commerce, SaaS, and marketing websites.
- Launched 1 Shopify Hydrogen storefront and 3 React/Next.js applications supporting direct-to-consumer and B2B brands.
- Build and maintain customer-facing experiences with React, Next.js, Shopify Hydrogen, WordPress, PHP, JavaScript, HTML, and CSS.
- Support 5+ e-commerce brands, 100+ product offerings, custom product configurations, and websites receiving 850,000+ annual visits.
- Create reusable UI components, product flows, comparison experiences, landing pages, and customer education that clarify complex products and strengthen conversion paths.
- Produced 389+ Amazon listing assets and product visuals, connecting on-site UX with consistent marketplace presentation.
- Collaborate with leadership, engineering, marketing, and operations in a five-person cross-functional team to move work from concept through production.

UX/UI Frontend Developer

Monnit Software | 2022 - 2023

- Generated \$65,000 in client revenue through custom software design and frontend implementation.
- Redesigned onboarding, homepage, and setup experiences using research, testing, and data-informed design decisions.
- Created user flows, high-fidelity mockups, prototypes, and responsive interfaces using HTML, CSS, and JavaScript.

SELECTED PROJECTS

Cabana Filters | *Shopify E-commerce* | cabanafilters.com/

Designed and built customer-facing Shopify experiences for an air-filter brand, including product education, comparison content, landing-page systems, branded visual assets, and responsive UX improvements.

StudioPlayer | *SaaS / Digital Signage* | studioplayer.com/

Designed and developed a responsive SaaS marketing experience that simplified product communication, improved visual hierarchy, and translated a technical platform into a clearer customer journey.

My Logo Mat | *Custom Product E-commerce* | mylogomat.com/

Built product-focused frontend experiences for a configurable custom-product business, including responsive layouts, customer education, visual hierarchy, and conversion-oriented shopping flows.

Concrete Connections NWA | *Independent Client Website* | concreteconnectionsna.com/

Led UX/UI direction and frontend implementation for an artificial-rockwork and concrete-sculpting business, creating its production web presence from concept through launch.

ADDITIONAL EXPERIENCE

UX/UI Designer

Eufaula Properties | 2018 - 2019

- Designed website experiences, wireframes, and prototypes while supporting lead-generation marketing initiatives.

Art Director

Cemrock Landscapes | 2015 - 2020

- Increased company profits by \$1.2M through process improvements, led a team of artists, and delivered large-scale architectural design projects.
