CREDENTIALS

- Full-Stack Software Development (2022)
- JavaScript, Codecademy (2022)
- UX/UI Design (2018)
- Adobe Photoshop & Illustrator

01 SUMMARY

Frontend UX Engineer who ships production React/Next.js and Shopify Hydrogen interfaces end-to-end — research and wireframes through code, QA, and launch. Led a platform redesign that went from UX evaluation to shipped product in one week and generated \$65,000 in client revenue; builds storefronts and apps running across 10+ brands and 850,000+ annual visits.

02 EXPERIENCE

Frontend UX Engineer / E-commerce Frontend Developer

JUL 2023 – PRESENT

RED7 SYSTEMS

- Own frontend product delivery end-to-end — wireframes through implementation, QA, and launch — across 10+ brands, 100+ product offerings, and sites totaling 850,000+ annual visits.
- Shipped 1 Shopify Hydrogen storefront (GraphQL Storefront API) and 3 React/Next.js applications for direct-to-consumer and B2B brands.
- Built reusable UI components, comparison tools, and product-configuration flows that turn complex purchasing decisions into clear customer journeys.
- Added Playwright coverage for critical checkout and payment flows, catching payment-related bugs pre-release and cutting regression risk across cross-browser QA.
- Produced 389+ Amazon listing assets and product visuals, aligning marketplace presentation with on-site customer experience.
- Partner with leadership, engineering, marketing, and operations in a five-person cross-functional team to move work from concept through production.

UX/UI Front-End Developer

2022 – 2023

MONNIT SOFTWARE

- Led a full UX-to-production redesign of a software platform — evaluation, usability testing, wireframes, and stakeholder presentation through shipped interface — in one week, generating \$65,000 in client revenue.
- Redesigned onboarding, homepage, and product-setup experiences using research, testing, and data-informed decisions; translated approved designs into responsive interfaces with JavaScript, C#, HTML, and CSS.
- Created user flows, wireframes, and high-fidelity concepts in Adobe InDesign, presenting recommendations directly to stakeholders.
- Built an instructional PWA-install animation, removing an app-store step from user onboarding.

03 SELECTED PROJECTS

Cabana Filters cabanafilters.com

Shopify E-commerce · Sole design owner, 2-dev build team — Owned UX/UI direction for a tiered air-filter brand: product comparison tool, ASHRAE-rated tier education, and an onboarding air-quality assessment flow.

StudioPlayer studioplayer.com

SaaS / Digital Signage · Sole developer — Independently designed and built a responsive marketing site translating a technical screen-management platform into a clearer customer journey.

My Logo Mat mylogomat.com

Custom E-commerce · Sole developer · 100/100 Lighthouse — Independently built a configurable custom-mat storefront with a product-match quiz and conversion-oriented shopping flow, shipping at a perfect Lighthouse performance score.

Concrete Connections NWA concreteconnectionsna.com

Independent Client · Sole owner — Led UX/UI direction, brand presentation, and frontend implementation from concept through production launch.

04 ADDITIONAL EXPERIENCE

UX/UI Designer

2018 – 2019

EUFAULA PROPERTIES

- Created the company logo, website designs, wireframes, and prototypes while supporting Google Analytics, lead-generation marketing, and promotional materials.

Art Director

2015 – 2020

CEMROCK LANDSCAPES

- Increased company profits by \$1.2M through process improvements, led a team of artists, and delivered large-scale architectural design projects.
